Two-way Video with Two Audio and One Data for PTZ Control

The FMV-603 is a duplex Video transmission system with two duplex Audio ports and a single duplex Data port, ideal for CCTV cameras, PTZ video conferencing, and ITS. Status indicators on Video, Sync, FM Data, carrier detect, voltage, temperature, and optical levels are monitored via LEDs.

System Design

All units come in a small module or Insert Card version. The cards can be inserted into our 18-slot, 19" rackmountable card cage (CC-18-80W), or one of our smaller Desk Top Card Racks (DTCR series).

The Desk Top Card Racks can handle one, two, four, or seven cards, allowing for greater flexibility and future expansion. They can sit on a flat surface as a larger stand-alone unit, or can be surface mounted with the flanges provided. Each one of our card housings operates with an appropriate power supply. The regulated switching power supply has short circuit protection and an input operating voltage of 85-265 V_{AC}.
